

# **EXHIBIT 3**

**Part 2 of 4**

1 for his skills in recruiting new CEOs and senior executives for startups Defendant Benchmark  
2 invested in.

3 105. Love had helped Defendant Benchmark to replace senior management for a  
4 number of Benchmark portfolio companies including Gaia, Lindon Labs, Pure Play, and  
5 When.com. In addition, Love had been retained to replace Defendant Benchmark's advisor,  
6 Defendant Hoffman, as the CEO of LinkedIn.

7 106. Because of Defendant Benchmark's interference, Fatdoor, Inc. Board members  
8 Harris, Jr. and Monsalve replaced Plaintiff as CEO. Particularly, on or about July 27, 2007,  
9 Fatdoor, Inc. Chairman Harris, Jr. let Plaintiff know that his services would no longer be required  
10 at Fatdoor, Inc. because the company would be going in a different direction than the  
11 neighborhood space based on feedback they received from Defendant Harvey and Defendant  
12 Benchmark. Harris, Jr. would be the interim CEO until a replacement was found by Defendant  
13 Benchmark headhunter Love to take Fatdoor, Inc.'s business in a different direction than one  
14 centered around neighborhoods and to make Fatdoor, Inc. more attractive to investors in future  
15 rounds.

16 107. This development came as a shock to Plaintiff because approximately one month  
17 earlier, Plaintiff had received a thank you email from Fatdoor, Inc. board member Drazan  
18 commenting "impressive how much value you have created on such modest spending. Pause for  
19 a moment to reflect on what you have produced...38 patent applications, an impressively  
20 functional website, thousands of initial subscribers, tens if not hundreds of thousands of page  
21 views, strategic interest from the most sophisticated media properties and institutions in the  
22 world, world class employees, candid and supportive feedback from your user community, the list  
23 goes on....Thank you for all your endless hours and unbridled enthusiasm.." The development  
24 was also particularly injurious for Plaintiff since he had worked countless hours on the  
25 Nextdoor/Fatdoor concept, and had left his only source of income behind to build the venture.

26 108. In addition, what made the forced sabbatical/termination even more troubling was  
27 the fact that on or about August 7, 2007, Plaintiff received an email from Heather Harde and  
28 Michael Arrington from TechCrunch stating that "Fatdoor has been selected as a TechCrunch20

1 "finalist" for the top 20 startups of the year of the year 2007. When Plaintiff asked Fatdoor, Inc.  
2 Chairman Harris, Jr. and new Norwest investor Monsalve whether the opportunity should be  
3 pursued, Plaintiff was asked to decline the invitation by Techcrunch because Fatdoor, Inc. was  
4 rethinking the neighborhood space based on comments made to them by Defendant Harvey at  
5 Defendant Benchmark. On or about August 7, 2007, Plaintiff canceled his meeting with Heather  
6 Harde and Michael Arrington scheduled for that same afternoon per the request of Fatdoor, Inc.'s  
7 Chairman, Harris, Jr.

8 109. Nonetheless, Plaintiff sent a kind and diplomatic email to all Fatdoor, Inc.  
9 stakeholders thanking them for the opportunity to develop the Nextdoor/Fatdoor concept and  
10 wishing them the best of luck. Plaintiff had an exit interview with Love on or about August 8,  
11 2007. Then, during the week of August 15, 2007, approximately one and half months after the  
12 pull out of funding by Defendant Benchmark, Plaintiff was immediately asked to no longer come  
13 to the offices of Fatdoor, Inc., the company he had started, and was no longer invited to  
14 participate in strategic decisions regarding the company.

15 110. Upon information and belief, on or about October 2007, Fatdoor, Inc. hired a new  
16 CEO, Jennifer Dulski ("Dulski"), based on a recommendation from the headhunter referred by  
17 Defendant Benchmark – Love. Incidentally, Dulski is only one currently identified former  
18 Fatdoor, Inc. executive connected via Facebook.com to Defendant Tolia, the former EIR of  
19 Defendant Benchmark who is now the CEO of Defendant Nextdoor.com, Inc. Dulski abandoned  
20 the pursuit of the Nextdoor.com domain immediately after joining. On or about April 2, 2008,  
21 Dulski changed the name of Fatdoor, Inc. to Center'd Corporation, Inc.

22 111. Upon information and belief, Dulski then made a strategic change away from the  
23 original Nextdoor/Fatdoor concept of getting to know your neighbors and moved the direction of  
24 Fatdoor, Inc. into a local site for mothers to plan events. The website created to host this concept,  
25 www.centerd.com, failed to gain traction and a decision was made to create a new effort called  
26 the DealMap focused on the mapping of local deals. On or about August 1, 2011, Google, Inc.  
27 purchased the Nextdoor/Fatdoor patent assets from Center'd.

28 112. The CEO of Nextdoor was announced to be Defendant Tolia, the former EIR at  
- 31 -

1 Defendant Benchmark, on or about October 26, 2011. It was reported in the San Jose Mercury  
2 News on or about October 26, 2011 that "software developed by an early Google (GOOG) Maps  
3 employee" was used as the "key" technology of Nextdoor "that makes sure only people who live  
4 in a specific neighborhood are able to join its network -- giving users a level of privacy that sites  
5 like Facebook don't." (See Exhibit H). Upon reason and belief, this key technology "that makes  
6 sure only people who live in a specific neighborhood are able to join its network -- giving users a  
7 level of privacy that sites like Facebook don't" was stolen and opportunistically misappropriated  
8 from Plaintiff by Defendants Taylor and Norris while they were employed at Defendant  
9 Benchmark. (See Exhibit H, Exhibit I, and Exhibit K).

10 113. A press release was issued on or about October 26, 2011, after the Original  
11 Complaint in this case had been filed stating that a new startup called "Nextdoor" was launched.  
12 Surprisingly, a photograph on Facebook.com revealed that Defendants Tolia, Hoffman, Taylor  
13 and Cassidy had met only six days previously at a dinner party at the home of a Trevor Traina on  
14 or about October 20, 2011. (See Exhibits L1-L4). In addition, Defendants Taylor and Tolia are  
15 seen visible dining together shortly after the launch of Nextdoor.com on or around November 17,  
16 2011. (See Exhibits L1-L4). Furthermore, the same Defendants were found in a number of  
17 photographs throughout the months prior to the launch of Nextdoor.com, Inc., in the months  
18 preceding its public launch in April 2011, and in September 2011. (See Exhibits L1-L4). Exhibits  
19 L1-L4 demonstrate that Defendant Tolia was, and continues to be, an invited attendee to a  
20 monthly CEO dinner series organized by Defendant Taylor in which the Defendants privately  
21 meet on a regular basis to opportunistically share ideas in the "whisper circuit" as described in the  
22 1999 New York Times article including tips and ideas about confidential communications privy  
23 only to certain Defendants (See Exhibit J).

24 114. Interestingly, Defendant Janakiraman, who Defendant Tolia later attributed to  
25 developing the "key" technology (rather than Defendant Taylor) (retracting and clarifying  
26 previous statements to the San Jose Mercury News made weeks earlier in an interview with the  
27 All Things Digital blog of the Wall Street Journal) for Nextdoor.com, Inc., is not found in any of  
28 these publicly visible photographs. (See Exhibits H, and L1-L4).

1           115. Upon information and belief, Defendant Leary was also a former EIR at  
2 Defendant Benchmark and is currently the Co-Founder and Vice President of Marketing at  
3 Nexdoor.com, Inc. Based on articles posted on the Internet, Defendants Tolia and Leary have  
4 been EIRs at Defendant Benchmark since at least March 2007. Their positions as EIRs have been  
5 inconspicuous, according to an article in ValleyWag/Gawker on or about March 21, 2007.  
6 Defendant Tolia and Leary confirmed their Benchmark EIR status on or about August 29, 2007 in  
7 an article in VentureBeat, a few months before the formation of Round Two, Inc. on or about  
8 December 4, 2007 which listed Defendant Tolia as CEO and Defendant Leary as the Vice  
9 President of Marketing.

10          116. Upon information and belief, Defendants Tolia, Taylor and Norris all worked at  
11 Defendant Benchmark as EIRs on and about the same day that Defendants learned of the  
12 confidential and unpublished technical details, security algorithms, methods and trade secrets  
13 associated with Nextdoor/Fatdoor from Plaintiff. (See Exhibit I). Based on the quoted facts  
14 above, and upon reason and belief, Defendants opportunistically conspired together to  
15 misappropriate the confidential trade secrets, materials, knowhow, and algorithms from Plaintiff  
16 to form the Round Two, Inc. venture on or about December 4, 2007. (See Exhibit K).

17          117. Upon information and belief, funding was not difficult for Defendant Tolia, as  
18 Defendant Benchmark had funded Defendant Tolia in the past with little more than a PowerPoint  
19 presentation according to the same article in VentureBeat on or about August 29, 2007 which  
20 quoted a previous article in the New York Times stating that Defendant Tolia's last company  
21 "launched in 12 weeks, and raised \$8 million from Benchmark and August with little more than a  
22 PowerPoint presentation." (See Exhibit J).

23          118. Plaintiff went on unemployment for the remainder of 2007 as he had no law  
24 practice to fall back on. Plaintiff had to rebuild every client from scratch as the sole income  
25 earner for his family of four, and was unable to complete graduate studies in engineering at  
26 Stanford due to a lack of financial resources.

27          ///

28          ///

DEFENDANTS' WRONGFUL COURSE OF CONDUCT

1           119. The Nextdoor/Fatdoor concept was originally created by Plaintiff on or about  
2 August 2005 while running for Cupertino City Council. At that time, Plaintiff was surprised by  
3 the lack of web based tools available to create walking maps of neighborhoods, and annotate  
4 information regarding neighbors around a particular residence. Plaintiff initially developed the  
5 Nextdoor/Fatdoor concept as a mash up of maps created using MapQuest and a Wikipedia style  
6 entry page for each neighbor met. A conception document was first prepared on or about August  
7 21, 2005 and clearly included the name "Nextdoor."

8           120. The conception document contained the following paragraph: "What we are trying  
9 to create is a way to create a way for neighbors to get to know each other and their surrounding  
10 businesses more easily through the Internet. The UI of the site will have a map of your home  
11 with a social networking page pop up on the right when one clicks a particular home/location.  
12 There will be no information about prices of a home, no information about the number of  
13 bedrooms of a home, etc. People will be the focus, not the real estate." [sic]The document was  
14 improved and modified on or about November 2006, and submitted as an attachment in the  
15 Nextdoor/Fatdoor diligence folder to the Defendants on or about June 22, 2007 (See Exhibit B).  
16 The document included the following statement: "Note: we don't have the domain nextdoor.com  
17 yet, ive placed a bid on it. We do have modernvilliage.com, but im trying to find a better name.  
18 let me know if you find something that is better and available for sale. Should know about  
19 nextdoor.com by the end of this week." (See Exhibit B).

20           121. Plaintiff and Fatdoor, Inc. intended to purchase the Nextdoor.com domain name  
21 shortly after Series B funding. Plaintiff worked diligently between August 21, 2005 and June 15,  
22 2006 to get the Nextdoor/Fatdoor website launched along with his business partner and assistant  
23 Rana. During this period, Rana created screenshots and wireframes of the Nextdoor/Fatdoor  
24 concept using PowerPoint showing the name 'Nextdoor'. There were two mockup images of the  
25 Nextdoor/Fatdoor concept shared with the Defendants by Plaintiff on or about June 22, 2007.  
26 The first mockup image shows a photo of Rana, with a personal profile wall feed from neighbors  
27 who provide comments on Rana's wall. A search area box read "search neighborhood." The  
28

1 word "Nextdoor" was clearly shown in the upper, left-hand side of the screenshot. A map was  
 2 shown in the screenshot illustrating the location of Rana's home and images indicating which  
 3 neighbors have and have not joined the neighborhood surrounding Rana's representative home.

4 122. The Nextdoor/Fatdoor site was first publicly mentioned in VentureBeat on or  
 5 about April 3, 2007 in a story titled "The dirt on Amazon, Steve Jobs, Topix, Fatdoor, MySpace,  
 6 VC tax and more" in which VentureBeat described Nextdoor/Fatdoor as :

7       "FatDoor, secretive social network, to launch soon — The Palo  
 8 Alto-based start-up, backed by Bill Harris, former CEO of Paypal  
 9 and Intuit, and Bertram Capital, launches April 15, and describes  
 10 itself as "a wikipedia of people," with over 130 million people and  
 business profiles at launch. It wants to let you get to know your  
 neighbors....Stay tuned" (See Exhibit E).

11 123. The Nextdoor/Fatdoor idea by Plaintiff was very well received by major thought  
 12 leaders, including Pincus, who wrote to Plaintiff and Fatdoor, Inc. director Drazan on or about  
 13 March 5, 2007 stating:

14       "raj, your idea and background were both compelling. sorry if i  
 15 barraged you with feedback before you could get the whole idea across.  
 16 i'd def be interesting following up as i like the general macro space and  
 17 think there are many directions you coudl go with it. best, mark" [sic]

18 124. Pincus agreed to participate in the first Nextdoor/Fatdoor private beta launch  
 19 between March 2007 and June 2007. Four months later, Pincus independently started the  
 20 successful venture Zynga and his affirmation of Plaintiff and the Nextdoor/Fatdoor concept right  
 21 before Zynga was founded was a testament to the power and potential of the Nextdoor/Fatdoor  
 22 idea and Plaintiff's ability, but for the interference and theft by Defendants as described in this  
 23 First Amended Complaint.

24 125. VentureBeat later covered the Nextdoor/Fatdoor concept again on May 28, 2007  
 25 in an article titled "Fatdoor turns neighborhoods into online social networks," dating the initial  
 26 tests around Plaintiff's city of Cupertino, California between August 21, 2005 and November 15,  
 27 2006. The article also included a picture of Plaintiff's home and family in the user interface  
 28 views:

1       “Ever wanted to get to know your neighbors before interacting  
2 with them in real life? If so, fatdoor, which launches its public beta  
3 tomorrow, might be for you.... Fatdoor will start out covering  
4 Silicon Valley and spread outward.... The interface is clean and  
5 simple. The alpha version that we saw in a demo covered only a  
page that highlights groups like the “Parent’s Babysitting  
Exchange,” and the “Kiwanis Club of Cupertino.” (See Exhibit E).

6 The secret technical details, software algorithms, knowhow, and then unpublished patent  
7 applications that permitted the Nextdoor/Fatdoor concept to be built as described in the  
8 VentureBeat article of May 28, 2007 were opportunistically misappropriated and stolen by  
9 Defendants through Defendants Taylor and Gurley as described in this First Amended Complaint.  
10 (See Exhibit K).

11       126. Mashable.com also covered the Nextdoor/Fatdoor concept on or about May 28,  
12 2007 in an article titled “FatDoor Launches Social Network for Your Neighborhood” showing a  
13 number of actual screenshots of the Nextdoor/Fatdoor concept and describing Nextdoor/Fatdoor  
14 as:

15       16       “FatDoor is a way to get to know your neighbors on a very  
17 local level, and displays information over a Microsoft Virtual  
18 Earth map that can toggle between 2D and 3D views. ....If a  
neighbor hasn’t been to FatDoor to “claim” their location, their  
icon will be shown on the street as opposed to their house, and  
you can leave messages for them that they will see once  
they’ve signed up to use the site. You can invite users to  
FatDoor with their email address or their street address.” (See  
19 Exhibit F).

20       21       The secret technical details, software algorithms, knowhow, and then unpublished patent  
22 applications that permitted the Nextdoor/Fatdoor concept to be built as described in the  
23 Mashable.com article of May 28, 2007 were opportunistically misappropriated and stolen by  
24 Defendants through Defendants Taylor and Gurley as described in this First Amended Complaint.  
25 (See Exhibit K).

26       127. Wired Magazine also covered the Nextdoor/Fatdoor concept on or about May 31,  
27 2007 in an article titled “Fatdoor CEO Talks About Balancing Security With Community” that

1 described the difficult problem that Nextdoor/Fatdoor attempted to solve as:

2        "With all the commotion about everything that's visible on  
3 Google's StreetView, there seems to be a lot of justifiable paranoia  
4 associated with the swiftly evolving map tools on the market.  
5 Likewise, there's been a lot of speculation as to how security and  
6 privacy are going to be dealt with on the social networking sites  
7 that draw information from these web apps.... saw this at work  
earlier this week with the announcement of the alpha launch of  
social networking site Fatdoor at Where 2.0. As if the standard  
security issues aren't tricky enough when it comes to the average  
site, Fatdoor's mashup of Live Earth aerial images with wiki  
versions of users' neighborhoods has a lot of hand wringing going  
on." (See Exhibit G).

9 It should be noted that Defendants Taylor and Norris were part of the Google Maps team  
10 suffering from the privacy and security concerns centered around Google StreetViews described  
11 in the article above, as they joined Defendant Benchmark on or about June 2007 after leaving  
12 Google, Inc.

13        128. The Wired Magazine article of May 31, 2007 went on to describe the general  
14 concepts of Nextdoor/Fatdoor developed by Plaintiff to account for neighborhood security as:

16        "It wasn't until Abhyanker let me take his neighborhood for a test  
drive that I started to understand how this actually plays out.  
17 Fatdoor is hardly the stalking tool we all feared. In fact, its simple  
18 interface made Abhyanker's own community fit together more like  
a wiki version of a town hall. Users in the neighborhood can  
19 broadcast general messages to the entire block, submit an entry  
about a local business, or even submit entries for friends and other  
neighbors. Abhyanker's neighborhood is even set up to elect  
20 moderators to help police this conduct too. Paired with the amount  
of control the user has over how much or how little information the  
neighborhood can access about themselves, it actually  
21 seemed....pretty safe." (See Exhibit G).

23        129. In addition, the Wired Magazine article of May 31, 2007 went on to describe the  
24 end product of the secret confidential security algorithms developed by Plaintiff to account for  
25 neighborhood security: "As far as peeking into other neighborhoods? Abhyanker has that covered  
26 too. "We've been playing around with the distance, and after some testing we've found that  
keeping it at a 5 mile radius [from the user's residence] is the most reasonable," he said. "It keeps  
27 the focus on the neighborhood and also keeps the feeling of community. Of course, this is

1 something that we're going to have to change depending on the size and layout of a city, but  
2 during testing it seemed like the ideal distance." The secret technical details, software algorithms,  
3 knowhow, and then unpublished patent applications that permitted Nextdoor/Fatdoor concept to  
4 be built as described in the Wired Magazine article of May 31, 2007 were opportunistically  
5 misappropriated and stolen by Defendants through Defendants Taylor and Gurley as described in  
6 this Complaint. (See Exhibit G and Exhibit K).

7 130. A press release was issued on or about Wednesday, October 26, 2011 reporting  
8 that a new website was launched called "Nextdoor.com." The CEO of Nextdoor.com, Inc. was  
9 announced to be Defendant Tolia, a former EIR at Defendant Benchmark. Based on articles  
10 posted on the Internet, Defendant Tolia has inconspicuously been an EIR at Defendant  
11 Benchmark since at least March 2007. Defendant Tolia confirmed his EIR status at Defendant  
12 Benchmark on or about August 30, 2007.

13 131. The Economic Times reported on or about October 29, 2011 that Nextdoor.com,  
14 Inc. had raised between ten (10) million and fifteen (15) million dollars in venture capital  
15 financing from Defendant Benchmark and Shasta Ventures. Defendant Gurley, a partner at  
16 Defendant Benchmark, is an investor and on the Board of Nextdoor.com, Inc. Upon reason and  
17 belief, Defendant Benchmark opportunistically misappropriated from Plaintiff, the key  
18 technology of limiting views of neighbors to only a constrained geo-spatial set from  
19 Nextdoor/Fatdoor through Defendants Taylor and Gurley. (See Exhibit G and Exhibit K).

20 132. On or about October 26, 2011, a San Jose Mercury News article titled "Epinions  
21 co-founder Nirav Tolia back in the saddle with Facebook-like startup" made it clear that  
22 Defendant Benchmark had funded Nextdoor.com, Inc., and that Defendants Taylor and/or Norris  
23 contributed to the venture:

24 "Tolia said the site goes beyond neighborhood email listservs by  
25 giving users a simple and visually appealing interface and search  
26 tools. The key, he added, is software developed by an early Google  
27 (GOOG) Maps employee that makes sure only people who live in  
a specific neighborhood are able to join its network -- giving users  
a level of privacy that sites like Facebook don't." (See Exhibit H).

133. Upon reason and belief, the early Google Maps employee referenced in the article above is Defendant Taylor, who stole the key technology from Plaintiff. Defendant Tolia was inconspicuously an EIR at Defendant Benchmark in a failed attempt to keep confidential both his identity and Defendants' desire to start a competing venture to Fatdoor, Inc. An article in Gawker and Valleywag entitled "The rehabilitation of Nirav Tolia" published three months before the theft of the Nextdoor/Fatdoor concept by Defendants on March 21, 2007, stated: "Nirav Tolia is officially an EIR at Benchmark. Though he's not yet listed on the partnership's website along with the other EIRs."

134. In a follow up article published a few weeks after Fatdoor, Inc. terminated Plaintiff and retained the headhunter referred by the Defendant Benchmark, VentureBeat wrote on or about August 29, 2007 stating: "Nirav Tolia, who led one of the darling and prescient Web sites of the last boom, Epinions, but then who fell into controversy, and then disgrace, is back in the game. He has joined Silicon Valley venture capital firm Benchmark Capital as an 'Entrepreneur in Residence,' a position that lets him work at Benchmark's offices, sit in on company pitches and search for his next idea."

135. The next idea in the VentureBeat article is Round Two, Inc., later renamed to Nextdoor.com, Inc. The nature and business of the pivot to the neighborhood social networking space from an entirely different website called Fanbase.com related to college and professional sports was made public on or about October 16, 2011. The entire basis for Nextdoor.com, Inc.'s business rests on stolen and opportunistically misappropriated materials. Upon reason and belief, Defendant Benchmark funded Nextdoor.com, Inc. with between ten (10) million and fifteen (15) million dollars in equity capital between approximately December 4, 2007 and October 16, 2011.

136. Defendant Tolia was inconspicuously an EIR at Defendant Benchmark in a failed attempt to keep his identity and the Defendants' desire to start a competing venture to that of Plaintiff confidential. An article in Gawker and Valleywag titled "The rehabilitation of Nirav Tolia" on March 21, 2007 characterizes the current CEO of Nextdoor.com, Inc. as:

"Nirav Tolia — the Epinions exec who lied on his resume and provoked a bitter legal dispute with his fellow founders — is

1 back.... Epinions, a database of user reviews on everything from  
 2 gadgets to holiday resorts, was one of the hottest internet startups  
 3 of 1999. Tolia made about \$20m when the venture merged with  
 4 Dealtime and then went public. But his fellow founders, whose  
 5 shareholdings were wiped out in the deal, claimed Tolia had won  
 their consent only by withholding vital information about Epinions'  
 prospects. Already tarnished by the controversy, Tolia left the  
 company, and the Valley, in something close to disgrace, when it  
 emerged he'd lied about working for McKinsey, the elite  
 management consultants."

6 137. On or about August 29, 2007, a follow-up article appeared in Gawker and  
 7 ValleyWag titled "Nirav Tolia goes to Benchmark," less than two week after Plaintiff was fired  
 8 from Fatdoor, Inc., and approximately four months before Round Two, Inc. was officially  
 9 incorporated stating:

10  
 11 "The rehabilitation of Nirav Tolia is not just complete — it is, at  
 12 long last, confirmed. The cofounder of Epinions, though tarred by  
 13 old controversies, will announce tomorrow morning that he has,  
 indeed, landed a long-rumored spot at Benchmark Capital as an  
 14 entrepreneur-in-residence. (Back in March, Valleywag emeritus  
 Nick Denton was told by several people Tolia was heading to  
 Benchmark.) He'll be joined there by Sarah Leary, a former  
 15 Epinions executive, and both hope to look at startup ideas having  
 to do with online community and user-generated content."

16  
 17 138. Because the first article was published on or about March 2007 and the second on  
 or about August 2007, the facts reveal a clear pattern of deceit by Defendants. Defendants lied to  
 18 keep the identity of Defendant Tolia secret in an effort to mislead, misguide, and  
 19 opportunistically steal the confidential knowhow, trade secrets, algorithm and business methods  
 20 around the time of their learning all the details of the Nextdoor/Fatdoor venture from Plaintiff on  
 21 or about June 2007.

22  
 23 139. The relationship between Defendant Taylor and Defendant Tolia is clear in a  
 24 number of Twitter posts including a post by Defendant Tolia. For example, on or about June 2,  
 25 2010, Defendant Tolia wrote in his Twitter feed: "Wow, Bret promoted to CTO at Facebook -  
 26 smart, great guy. Congrats!"

27  
 28 140. In an earlier article in the New York Times published on or about July 19, 1999,  
 the culture at Defendant Tolia's first company, Epinions, was described as: "[k]ept up constant

reconnaissance on the competitors it will be jockeying with this fall, despite those competitors' best efforts to keep their strategies secret. The Valley has what it calls the "whisper circuit," which is not so much wild gossip as the ability to call in old favors and threaten to pull people's teeth." (See Exhibit J).

141. The same article further states: “[s]ilicon Valley is sustained by the myth that you can come here from anywhere with sheer smarts and a firm handshake and make good. Second-generation Internet companies seem to seriously tip the favor to those already here. Four weeks ago on the whisper circuit, Tolia learned that an entrepreneur from Arizona was in town to shop a business plan for a company, called Publicopinion.com, with some of the same basic concepts, like rating reviews. Tolia took the challenge seriously.” (See Exhibit J).

142. Plaintiff is also from Arizona, lived there at the time in 1999, but is otherwise unrelated to Publicopinion.com. Defendant Tolia is originally from Odessa, Texas according to his Crunchbase.com profile, a state connection he shares in common with three of six Defendant Benchmark's partners in and around the year 2007, including Defendant Harvey, Defendant Gurley, and Benchmark partner Bruce Dunlevie. All three are from the state of Texas and publicly represent their pride in the state in public statements.

143. Defendant Harvey had a positive bias toward those who are from Texas. This is evident in eBoys where Defendant Harvey is described as someone who liked Defendant Gurley almost a year before personally meeting him because he was from Texas: ““He’s a good guy,” Kagle said, “a good human being,” Harvey said that must be the case-Gurley was from Texas, too.” (See eBoys, p. 233 - book which characterizes itself as a “National Best Seller” right on the cover page and is written by a self-proclaimed “writer in residence at Benchmark for two years, from the fall of 1997 to the fall of 1999”). Like Defendant Gurley, Defendant Tolia is also from Texas.

144. Defendant Harvey is not mentioned in any public materials associated with Nextdoor.com, Inc. Defendants Harvey and Gurley are both partners of Defendant Benchmark's investment fund. In addition, Defendant Gurley was recruited into Defendant Benchmark in 1999, after a positive recommendation from Defendant Harvey. According to eBoys, Defendants

1 Harvey and Gurley are both hunters, hunt together, and communicate on a variety of business  
2 related topics during hunts.

3 145. Sharing of ideas between Defendant Benchmark's partners is something that  
4 Defendant Harvey takes pride in. Defendant Harvey comments in eBoys: "We share in the  
5 governance and in the economics....It's like communist capitalist system". (Id. at 243). eBoys  
6 goes on to say, "...with his tongue working against his cheek, Harvey flipped the formula around-  
7 communists among capitalists." (Id. at 243). Upon reason and belief, this culture of communism  
8 at Defendant Benchmark is a sign that the fund openly shares its communal way of  
9 misappropriating ideas among its partnership, including the concept of Nextdoor/Fatdoor  
10 misappropriated from Plaintiff.

11 146. Defendant Gurley is mentioned as being associated with Nextdoor.com, Inc. in  
12 numerous press articles and is a Corporate Director of Nextdoor.com, Inc. in his capacity as the  
13 lead investing Benchmark partner in Nextdoor.com, Inc.

14 147. The same New York Times published on July 19, 1999 goes on to quote  
15 Defendant Gurley's characterization of Epinions as ""This is, unequivocally, the fastest I have  
16 ever seen a start-up move." The article goes on to say: "[e]verything is faster. Zero drag is  
17 optimal. For a while, new applicants would jokingly be asked about their "drag coefficient." Since  
18 the office is a full hour's commute from San Francisco, an apartment in the city was a full unit of  
19 drag. A spouse? Drag coefficient of one. Kids? A half point per. Then they recognized that such  
20 talk, even in jest, could be taken as discriminatory in a hiring situation." (See Exhibit J).

21 148. If the same test described by the Defendants were to be applied to Plaintiff in  
22 2007, he would have scored a drag coefficient of two (2) (Plaintiff was married with two kids in  
23 2007), perhaps explaining why Defendants sought to build their company Nextdoor.com, Inc.  
24 with an independent team that they favored and thus created the harm giving rise to the causes of  
25 action described herein. Tolia was unmarried at the time of the funding and did not have kids,  
26 and therefore had a "drag coefficient" of zero (0).

27 149. The article in VentureBeat on August 29, 2007 continues to describe the character  
28 of Defendant Tolka with respect to veracity and with respect to his previous dealings with Google

1 Inc., the current owner of the Nextdoor/Fatdoor patent portfolio on which Plaintiff is the lead  
 2 inventor:

3       “Google had considered buying Epinions, but some reports  
 4 suggested it canceled the deal after discovering Tolia had falsely  
 5 claimed he'd been employed as a consultant with McKinsey & Co.  
 6 He also wrongly stated he'd graduated from Stanford University.  
 7 Tolia was forced to resign from Shopping.com. The mistake was  
 8 another reason eBay settled a lawsuit filed by early founders at  
 9 Epinions claiming firms conspired with fellow founder Nirav Tolia  
 to deprive them and other employees of nearly \$40 million after  
 the acquisition.... Smarting from the controversy, Tolia moved to  
 New York where he had friends and lay low. He and firms  
 Benchmark and August have steadfastly declined to comment on  
 the case.”

10      150. In addition, the article in VentureBeat on or about August 29, 2007 describes the  
 11 relationships between Defendants Tolia, Taylor, Norris, and Benchmark very clearly:

12           “There, Tolia will join an impressive roster of other Benchmark  
 13 EIRs, including former Google employees, Bret Taylor and Jim  
 14 Norris (see our coverage), Mike Cassidy (our coverage) and Dave  
 15 Goldberg (our coverage). Tolia brings with him Sarah Leary  
 (below), an early employee at Epinions. She will also be an EIR.”

16      151. Additionally, Defendants Taylor, Gurley, Tolia, and Norris are all connected  
 17 friends on Facebook.com as of November 3, 2011. Upon reason and belief, these former EIRs at  
 18 Defendant Benchmark conspired in an illegal scheme to defraud and opportunistically steal  
 19 confidential trade secrets and knowhow from Plaintiff on or about June 2007 for the above  
 20 mentioned reasons.

21      152. An update provided to an article in the Wall Street Journal's All Things Digital  
 22 article on or about November 11, 2011 correcting previous statements made weeks before to a  
 23 San Jose Mercury reporter and which remained uncorrected until the Original Complaint was  
 24 filed, retracts and clarifies previous statements to say: “Tolia said he was referring to Prakash  
 25 Janakiraman, his co-founder at Fanbase and Nextdoor who formerly worked at Google on Maps”  
 26 instead of Defendant Taylor. Upon information and belief, it appears that Defendant Janakiraman  
 27 worked at Google, Inc. under Defendant Taylor, and was not an “early” employee of Google

1 Maps, as he joined on Google, Inc. in August 2005, which is approximately six months after the  
2 public release of Google Maps product on the Google Blog on or about February 8, 2005. In  
3 contrast, Defendant Taylor joined Google, Inc. in March 2003, and describes himself as a person  
4 who "Co-created and launched Google Maps" on his LinkedIn profile.

5 153. Defendant Tolia is also quoted in the Wall Street Journal's All Things Digital  
6 article on or around November 11, 2011 that he "joined Benchmark four months after Abhyanker  
7 made his pitch." Through this statement, Defendant Tolia admits of knowing about Plaintiff's  
8 pitch to Defendant Benchmark. Furthermore, Defendant Tolia's statement of "four months" is  
9 inconsistent with the announcement of Defendant Tolia's joining of Defendant Benchmark on or  
10 about August 30, 2007, which was approximately two (2) months from the first confidential  
11 disclosure to Defendant Benchmark, and inconsistent with the Gawker article which places him at  
12 Defendant Benchmark as an EIR months before the Plaintiff's first meeting with Defendant  
13 Benchmark on or about June 2007.

14 154. The matter is further supported by the fact that Defendants Benchmark and Tolia  
15 incorporated Round Two, Inc. on December 4, 2007, less than six months after misappropriating  
16 confidential information from Plaintiff. The article in VentureBeat on August 29, 2007 explains  
17 the role Defendant Benchmark had for Defendant Tolia:

18 "Tolia and his partner Leary do not have any set mandate as EIRs,  
19 but are expected to start their own company at some point (they are  
20 not a couple, by the way, something you might ask because they  
tag around so much together; they've just been through a lot with  
the Epinions saga, and consider themselves a team)."

21 155. Upon reason and belief, the responsibility that Defendant Tolia had at Defendant  
22 Benchmark as an EIR was to opportunistically steal the Nextdoor/Fatdoor concept from Plaintiff.  
23 Certainly, funding was not an issue for Defendant Tolia, as Defendant Benchmark had funded  
24 Defendant Tolia in the past with little more than a PowerPoint presentation. Upon reason and  
25 belief, it was easy for Defendant Tolia to raise money from Defendant Benchmark because they  
26 jointly conspired to misappropriate and opportunistically steal confidential materials from  
27 Plaintiff.

156. The Plaintiff has suffered actual harm in so far as Plaintiff has been blacklisted by the venture capital community as a direct result of the behavior by Defendants as described herein. A 2007 working paper titled "The Impact of Litigation on Venture Capitalist Reputation" by Dr. Vladimir Atanasov, Kate Litvak and Vladimir Ivanov states: "...the tightness of the VC community may play against a complaining founder, instead of against the misbehaving VC, if the merits of complaints are hard to estimate and if VCs tend to support their own and distrust "trouble-makers." The "no lunch in this town" gossip that can often hear in founder circles indicates that the fear (warranted or not) of VCs' implicit collusion not to fund complaining founders may restrict the flow of information about VC misbehavior and thus induce more misbehavior." ("The Impact of Litigation on Venture Capitalist Reputation," see page 11).

157. This issue is particularly relevant to the present dispute in that Plaintiff's new company Trademarkia (see [www.trademarkia.com](http://www.trademarkia.com)) was recently approached by Norwest, the same venture fund that had funded Plaintiff's previous company, Fatdoor, Inc. without participation from Defendant Benchmark. The venture Trademarkia.com was created by the Plaintiff between 2008 and 2011, after being fired from Fatdoor, Inc. Norwest Vice President David Su wrote to Plaintiff on November 1, 2011 stating:

"Raj, I hope this message finds you well. By way of brief background, I am a Vice President with Norwest Venture Partners, a \$3.7 billion venture capital and growth equity fund investing in technology and services companies. I have heard a lot of great things about Trademarkia and was hoping to set up a time to speak with you in order to give you more of an introduction to Norwest, but also to see if I could learn a bit more about your company and see if there might be an opportunity for us to work together. As a fund, we spend a lot of time in the online legal and services space and it would be great to have a call where we can share notes and establish a relationship. At Norwest, we make investments in businesses to take them to the next level whether through organic growth or growth through acquisitions. In addition, we are also open to providing liquidity to previous shareholders and founders who may want to diversify their holdings and take some risk off the table. We often find that by taking some chips off the table, founders and management team members are able to feel more comfortable in aggressively growing the business. It would be great to set up a call with you whenever you are available. In the meantime, I have attached some information about Norwest. Additional information can be found on our website: [www.nvp.com](http://www.nvp.com). I look forward to hearing from you. Regards, David David P. Su"

158. However, the possibility of a meeting was promptly dismissed and put aside indefinitely when Plaintiff responded:

"Sergio Monsalve at Norwest invested in my last company. Can you check if he is interested in working with me again first? Copying Sergio. If he is open to that possibility, I would be happy to speak with Norwest again. Thanks, Raj"

159. The meeting was dismissed after this email. This fact pattern shows the actual harm that has been suffered by Plaintiff in that Plaintiff has now been harmed as a result of bringing forth the allegations described herein.

160. On October 30, 2011, Drazan, a former board member of Fatdoor, Inc. and the first investor in the Nextdoor/Fatdoor concept wrote an email to Plaintiff, Monsalve, Chandu Thota, Harris Jr., and Dulski with the title “fatdoor or next door”, and having a link to an article in the L.A. Times featuring the new Nextdoor.com, Inc. venture by Defendant Tolia.

<sup>161</sup> In a follow up email, the Plaintiff wrote on October 31, 2011:

"Jeff, Thanks for the forward. Nextdoor by Benchmark is quite a surprise! We had disclosed the name 'Nextdoor' to Benchmark during the diligence process during the summer of 2007. Babar and I were not able to buy this domain 'Nextdoor' in 2005/2006 when we first came up with the concept, so later opted for 'Fatdoor'.

I will forward you the relevant email in which we had disclosed this to Dan Hansen before Series B financing. We had even given Benchmark screenshots of the conception of the concept having the name Nextdoor.

Wonder why would they want to even copy the name verbatim? Benchmark had represented to us in email that they had no conflicts of interest, and were not working on anything similar. Interestingly, the CEO of Nextdoor, Nirav Tolia, is an EIR at Benchmark who apparently has been there since 2007. See:  
<http://gawker.com/245891/the-rehabilitation-of-nirav-tolia>  
<http://m.gawker.com/294944/nirav-tolia-goes-to-benchmark>  
Looks like they were planning on side stepping Fatdoor from the start, and creating their own using the knowledge they learned from us, and their own EIRs? We had a number of meetings with Benchmark, and they even had detailed meetings with us and EIRs there at the time.

Good thing that some of the Fatdoor patents are now issuing into

granted patents. I see that two Fatdoor just issued in the past couple of months. I wonder if Google, or any of us, should take any recourse. Let me know if any of you are interested in exploring that. I am inclined to pursue it, as it just seems grossly unethical. Raj”

162. In a follow up email on October 31, 2011, Drazan wrote:

"Not me...I look at it simply as testimony to the legitimacy of your idea. We either didn't get it right or were before our time. You need a syzygy in this business. Best Regards, Jeff"

163. As of the writing of this First Amended Complaint, other potential plaintiffs have not yet responded as to whether they would like to join as co-plaintiffs. Google, Inc.'s General Counsel, Mr. Kent Walker, was notified of the Original Complaint. No follow up decisions have been received as to whether Google, Inc. wishes to join as a co-plaintiff in this action.

164. In addition, Fenwick & West, LLP ("Fenwick"), a law firm, has been retained by Defendants Tolia, Leary, and Nextdoor.com, Inc. to represent them in this litigation. Plaintiff had written an email to Fenwick partner Rajiv P. Patel ("Patel") on or about February 6, 2007, just four days after the one million dollar (\$1,000,000.00) Series A funding of Fatdoor, Inc. around the Nextdoor/Fatdoor concept stating:

"I am now 100% dedicated to Fatdoor, no longer available for billable time. My venture Fatdoor is now funded.. we're planning on launching in April. Lets catch up soon! Raj".

165. Patel had responded to Plaintiff on or about February 6, 2007 stating: "CONGRATS on the FatDoor!!!...Regards, Rajiv" using a Fenwick email address. Shortly afterwards, Plaintiff had asked Patel if he would be interested in taking over representation of all or at least some of Plaintiff's clients because the terms of the Plaintiff's new funding had required his full time attention in building the Nextdoor/Fatdoor concept into a working business for Fatdoor, Inc. Plaintiff told all his clients of his new role as the full time CEO of Fatdoor, Inc. and that he would need to transfer responsibilities on all legal matters to other law firms. To ensure a smooth transition, different firms including Fenwick were given as recommendations.

1           166. A detailed list of the Plaintiff's clients was shared with Fenwick through partner  
2 Patel on or about April 16, 2007 by Raj Abhyanker LLP (Plaintiff's private solo practice law  
3 firm) assistant Rana (who is now a Senior Product Manager at Google, Inc.) in which Rana wrote  
4 to Patel at his Fenwick & West email address:

5                 "Hello Rajiv, how are things? Hope you're keeping well.  
6 Following on your recent talks with Raj, I'm sending you a profile  
7 summary of our clients (see attached), including brief notes on  
8 client type, technology space and matter status for each. Let me  
9 know if you have any questions on this, it would be great to hear  
back from you by the end of this week so we can plan accordingly.  
Best, Babar Rana."

10           167. Patel responded that same evening stating: "I'll try to take a look this evening."  
11 Fenwick was given an option to hire all employees of Plaintiff's private firm, a single partner  
12 LLP, treated as a proprietorship in California. An email with attachments sent by Rana to Patel  
13 on or about April 20, 2007 provided Fenwick with the entire operations chart along with a  
14 proposal to take over all employees of Plaintiff's private solo practice law firm, which is treated  
15 as a sole proprietorship under California law. Patel may be called as a witness to the present  
16 litigation for the above mentioned reasons.

17           168. These facts are material because they demonstrate that Plaintiff transferred his  
18 only source of income required to support a family of four to work on the Nextdoor/Fatdoor  
19 concept as a full-time CEO. In addition, these facts are relevant because Defendants  
20 Nextdoor.com, Inc., Tolia and Leary have chosen Fenwick to represent them in this litigation,  
21 despite informal written objections by Plaintiff.

22           169. Furthermore, Fenwick is also patent counsel to potential co-plaintiff Google, Inc.,  
23 a company which now owns the rights to the Nextdoor/Fatdoor patent portfolio on which Plaintiff  
24 is the lead inventor listed on the cover page of each Google, Inc. owned patent application related  
25 to the Nextdoor/Fatdoor concept. In addition, Google, Inc. now owns the rights to the original  
26 technology of the Nextdoor/Fatdoor concept, and has been notified of this lawsuit by Plaintiff as  
27 described above. As such, the actions of Fenwick to represent the Defendants are prejudicial to

the interests Plaintiff and to their current client Google, Inc. which owns the rights to the Nextdoor/Fatdoor patent portfolio. It is not clear that Fenwick has received a waiver from Google, Inc. permitting them to represent these Defendants. Plaintiff continues to believe that it would be grossly unfair and prejudicial if Fenwick continues to represent Defendants in the present litigation.

170. It should also be noted that the standing of the Plaintiff as a former owner of the intellectual property including trade secrets described herein is explicitly clear for the jurisdiction in which this First Amended Complaint is brought. In addition, Plaintiff has suffered considerable and substantial harm and damage as a result of Defendants' wrongful conduct and actions as will be described in the causes of action that follow.

## CAUSES OF ACTION

**FIRST CAUSE OF ACTION**

#### Misappropriation of Trade Secrets, Cal. Civ. Code § 3426

(Against Defendants Benchmark, Nextdoor.com, Inc., Harvey, Fenton, Lasky, Gurley, Taylor, Cassidy, Hoffman, Tolia, Leary, Norris, and DOES 1-100)

171. Plaintiff incorporates by reference paragraphs 1 through 170, inclusive, set forth above.

172. As a result of investment discussions with Fatdoor, Inc., Defendants became intimately familiar with Fatdoor Inc.'s operations and were granted access to Nextdoor/Fatdoor trade secrets.

173. Defendants knew or had reason to know that the Nextdoor/Fatdoor trade secrets that were acquired as alleged herein constituted or contained protectable trade secrets in that the information had independent economic value, was not generally known to the public or to others who could have obtained economic value from the disclosure or use of the information, and was the subject of reasonable efforts by Fatdoor, Inc. to ensure the secrecy of such information.

174. Plaintiff is informed and believes, and based thereon alleges, that Defendants opportunistically misappropriated and will continue to misappropriate Nextdoor/Fatdoor trade secrets to their own economic benefit by the wrongful disclosure and use of such information,

1 without the consent of Fatdoor, Inc. while knowing or having reason to know that they had  
2 acquired the Nextdoor/Fatdoor trade secrets under circumstances giving rise to a duty on their  
3 part to maintain their secrecy.

4           175. Plaintiff believes, and based thereon alleges that Defendant Benchmark's  
5 employees and agents disclosed such Nextdoor/Falldoor trade secrets to Nextdoor, Inc.'s  
6 employees and agents.

7           176. As a proximate result of Defendants' acts of misappropriation and use of  
8 Nextdoor/Fatdoor trade secrets, Plaintiff has suffered damages to date based on, among other  
9 things, loss of employment, loss of his common shares in Fatdoor Inc., loss of contributory equity  
10 interests to the original Fatdoor, Inc. concept, and expenses incurred in his efforts to remedy the  
11 effects of Defendants' unlawful conduct, in an amount not now known, but Plaintiff is informed  
12 and believes, and thereon alleges, exceeds the jurisdictional threshold for classification as an  
13 unlimited civil case. Unless Defendants are enjoined, such damages will increase. Plaintiff will  
14 seek leave of Court to amend this Complaint to set forth the exact amount of damages when they  
15 have been ascertained.

16           177. Plaintiff is informed and believes, and based thereon alleges, that Defendants have  
17           acted with oppression, fraud, and/or malice, and have deliberately caused and have intended to  
18           cause great economic harm to Plaintiff with full knowledge of the wrongfulness of their conduct.  
19           Plaintiff is further informed and believes, and based thereon alleges, that Defendants' conduct as  
20           alleged above was despicable, was carried on by Defendants with a willful and conscious  
21           disregard of Plaintiff's rights, and subjected Plaintiff to unjust hardship. Therefore, Plaintiff  
22           should be awarded punitive and exemplary damages sufficient to punish Defendants for engaging  
23           in this conduct and to deter similar conduct on their part in the future.

## **SECOND CAUSE OF ACTION**

Fraud and Conspiracy to Defraud

Fraud and Conspiracy to Commit Fraud  
(Against Defendants Benchmark, Nextdoor.com, Inc., Harvey, Fenton, Lasky, Gurley,  
Cassidy, Tolia, Leary, Norris, and DOES 1 – 100)

27 178. Plaintiff realleges and incorporates by reference paragraphs 1 through 177 as if

stated herein in their entirety.

179. Defendants violated the common law of fraud and California Civil Code §§ 1709, 1710, and 1572 through the material misrepresentations and non-disclosures alleged above, including the failure to truthfully respond to Plaintiff with respect to their conflicting interest and position in building Nextdoor.com, Inc. only months after misappropriating confidential information from Plaintiff. Defendants failed to disclose material facts concerning the creation of Nextdoor.com, Inc. – a company which was conceived and created from confidential information fraudulently misappropriated from Plaintiff. Through a plain reading of Gurley's own statements in the email sent to all portfolio companies around October 9, 2008, Gurley directly advised Tolia to adapt actions, decisions, etc. to expediently or effectively act in manners that sacrifice ethical principles by being "opportunistic". (See Exhibit K). Through their fraudulent actions, Defendants Harvey, Fenton, Lasky, Gurley, Cassidy, Tolia, Leary, and Norris aided and abetted the other Defendants in their fraudulent conduct.

180. Defendants made their material misrepresentations knowing that their statements were false and misleading and with the intent to defraud Plaintiff and other shareholders of Fatdoor, Inc. As alleged above, Defendants conspired with one another to make the material misrepresentations and acted in furtherance of their conspiracy by using those material misrepresentations to illegally compete with Fatdoor, Inc.

181. Plaintiff and Fatdoor, Inc. relied on Defendants' material misrepresentations by disclosing trade secrets, business plans, unpublished confidential patent applications, knowhow, and software technologies regarding the Nextdoor/Fatdoor conception.

182. As a proximate result of relying on Defendants' material misrepresentations, Plaintiff incurred actual damages consisting of the loss of his common shares in Fatdoor, Inc., loss of his employment with Fatdoor, Inc., and the value of the equity interests he would now have had in building and contributing to the original Fatdoor, Inc. concept.

183. Defendants' fraudulent conduct alleged above was done intentionally, through malice, fraud and oppression, with the intention of the part of the Defendants to deprive Plaintiff of his common stock and legal rights and was despicable conduct that subjected Plaintiff to cruel

and unjust hardship in conscious disregard for Plaintiff's rights, so as to justify an award of exemplary and punitive damages.

### **THIRD CAUSE OF ACTION**

**THIRD CAUSE OF ACTION**  
**Constructive Fraud and Aiding and Abetting Constructive Fraud**  
(Against Defendants Benchmark, Nextdoor.com, Inc., Harvey, Fenton, Lasky, Gurley,  
Cassidy, Tolia, Leary, Norris, and DOES 1 – 100)

184. Plaintiff realleges and incorporates by reference paragraphs 1 through 183, inclusive, set forth above.

185. Defendants are liable to Plaintiff for constructive fraud because they aided and abetted the other Defendants in their concealment of material facts concerning the business operations of Defendant Benchmark. Defendant Benchmark, through its partners and EIRs, actively supported, encouraged, aided and abetted other Defendants and actively participated in constructive fraud and concealing material information concerning their intentions to misappropriate Fatdoor Inc.'s confidential information in the guise of using that information to conduct potential pre-investment due diligence but instead created a similar company of their own – Nextdoor.com, Inc. Through a plain reading of Defendant Gurley's own statements in the email sent to all portfolio companies around October 9, 2008, Defendant Gurley directly advised Defendant Tolia to adapt actions, decisions, and to expediently or effectively act in manners that would sacrifice ethical principles by being "opportunistic." (See Exhibit K).

186. As a proximate result of relying on Defendants' material constructive fraud, Plaintiff incurred actual damages consisting of the loss of his common shares in Fatdoor, Inc., loss of his employment in Fatdoor, Inc., and the value of the equity interests they would have now had in building and contributing to the original Fatdoor, Inc. concept. In addition, Plaintiff has suffered losses, the exact amount of which will be proven at the time of trial.

187. Defendants' constructively fraudulent conduct alleged above was done intentionally, through malice, fraud and oppression, with the intention of the part of the Defendants to deprive Plaintiff of his common stock and legal rights and was despicable conduct that subjected Plaintiff to cruel and unjust hardship in conscious disregard for Plaintiff's rights, so as to justify an award of exemplary and punitive damages.

**FOURTH CAUSE OF ACTION**

**Negligent Interference with Existing and Prospective Economic Advantage**  
**(Against Defendants Benchmark, Harvey, Fenton, Lasky, Gurley, Taylor, Cassidy, Norris,**  
**and DOES 1-100)**

188. Plaintiff incorporates the allegations made in Paragraph 1 through 187 as if stated  
 herein in their entirety.

189. Prior to engaging in the aforementioned conduct, Defendants were fully aware  
 that Plaintiff had business relationships with numerous other investors, venture capitalists, and  
 parties interested in Plaintiff's confidential business ideas and novel inventions. Plaintiff had a  
 contractual relationship with Fatdoor, Inc. and a prospective relationship advantageous to Plaintiff  
 with several other parties, as mentioned above.

190. Plaintiff is informed and believes and thereon alleges that, in addition to the  
 relationship between Plaintiff and Defendant Benchmark, Defendant Benchmark and the  
 Benchmark partners mentioned herein also had a parallel and illicit relationship with Defendants  
 Tolia, Leary, Janakiraman, Taylor, and Norris. The conduct of Defendants as described above  
 was designed to wrongfully disrupt the economic relationships between Plaintiff, Fatdoor, Inc.,  
 and its clients, and indeed, the relationships were disrupted as a result of Defendants' actions.  
 Indeed, Defendants owed a duty of care to Plaintiff to maintain the information mentioned herein  
 in the utmost confidence. There was a special relationship between Plaintiff and Defendants.

191. In addition, Plaintiff had established relationships with numerous clients and  
 businesses that were interested in Plaintiff's confidential business ideas and novel inventions to  
 the substantial benefit of Plaintiff. Defendants knew of these relationships as a result of their pre-  
 investment dealings with Plaintiff and through their actions, negligently interfered with Plaintiff's  
 existing and prospective economic advantage. Defendants' wrongful conduct is independent of  
 the interference itself and proximately caused Plaintiff's injury and damage.

192. As a result of the wrongful conduct of Defendants, Plaintiff has been damaged in  
 an amount which will be proven at the time of trial. When Plaintiff has ascertained the full  
 amount of his damages, he will seek leave of Court to amend this Complaint accordingly.

193. The conduct of Defendants as alleged herein was purposeful and intentional and

was engaged in for the purpose of depriving Plaintiff of property or legal rights or otherwise causing injury, and was despicable conduct that subject Plaintiff to cruel and unjust hardship in conscious disregard of its rights, and was performed with fraud, oppression or malice so as to justify an award of exemplary or punitive damages against Defendants, the exact amount of which will be proven at the time of trial.

## FIFTH CAUSE OF ACTION

## Breach of Confidence

(Against Defendants Benchmark, Harvey, Fenton, Lasky, Gurley, Taylor, Cassidy,  
Hoffman, Norris and DOES 1 - 100)

194. Plaintiff incorporates the allegations made in Paragraph 1 through 193 as if stated  
herein in their entirety.

| 95. Plaintiff conveyed to Defendants his business ideas and inventions related to the  
Fatdoor/Nextdoor concept, which were confidential and novel.

196. Defendants knew that Plaintiff's business ideas and inventions were disclosed to them in confidence.

197. There was an understanding between Plaintiff and Defendants that such confidence should be maintained.

198. Defendants opportunistically misappropriated and used Plaintiff's business ideas and inventions in violation of such understanding.

199. Defendants violated such understanding knowingly and willfully.

200. As a direct and proximate result of Defendants' actions alleged above, Plaintiff has no adequate legal remedy, has been irreparably injured, and has suffered monetary damages, the exact amount of which will be proven at the time of trial.

## **SIXTH CAUSE OF ACTION**

## **Breach of Contract**

(Against Defendants Benchmark, Harvey, Fenton, Lasky, Gurley, Taylor, Cassidy, Norris  
and DOES 1 – 100)

201. Plaintiff incorporates the allegations made in Paragraph 1 through 200 as if stated herein in their entirety.

1           202. Plaintiff and Defendants Benchmark, Harvey, Fenton, Lasky, Gurley, Taylor,  
 2 Norris, and Cassidy entered into a contract on or about the summer of 2007 wherein Plaintiff  
 3 supplied confidential information to these Defendants related to the Nextdoor/Fatdoor concept for  
 4 the explicit purpose of conducting due diligence prior to potential investment in Fatdoor, Inc.

5           203. As part of the aforementioned contract, these Defendants were fully aware that  
 6 Plaintiff supplied aforementioned confidential information for the explicit purpose of due  
 7 diligence related to a potential investment in Fatdoor, Inc. by Defendant Benchmark.

8           204. As part of the aforementioned contract, Defendants explicitly represented to  
 9 Plaintiff that they were not developing a company similar to the Nextdoor/Fatdoor concept, and  
 10 even cleared all conflicts of interest in writing.

11           205. Plaintiff performed all the conditions, covenants, and promises of the  
 12 aforementioned contract in accordance with the terms and conditions of the oral contract by  
 13 supplying Defendant Benchmark and other Defendants with confidential information regarding  
 14 Nextdoor/Fatdoor and requested by Defendant Benchmark and other Defendants explicitly for  
 15 pre-investment due diligence purposes.

16           206. Defendants breached the agreement with Plaintiff by misappropriating the  
 17 confidential information supplied by Plaintiff and funded Nextdoor.com, Inc. with the  
 18 confidential information opportunistically misappropriated from Plaintiff despite explicitly stating  
 19 to Plaintiff, as a part of the agreement, that it was not developing a company similar to Plaintiff's  
 20 company.

21           207. Defendants therefore breached their contract with Plaintiff, who has been  
 22 damaged monetarily, the exact amount of which will be proven at the time of trial.

23           **SEVENTH CAUSE OF ACTION**  
 24           **Breach of Implied Covenant of Good Faith & Fair Dealing**  
 25           **(Against Defendants Benchmark, Harvey, Fenton, Lasky, Gurley, Taylor, Cassidy, Norris**  
              **and DOES 1 – 100)**

26           208. Plaintiff incorporates the allegations made in Paragraph 1 through 208 as if stated  
 27 herein in their entirety.

28           209. Plaintiff had a valid contract with Defendants that required Defendants not to  
 - 55 -

disclose confidential information and to use the information for the explicit purpose of due diligence related to a potential investment in Fatdoor, Inc. by Defendant Benchmark.

210. Defendants breached the implied covenant of good faith and fair dealing by misappropriating the confidential information supplied by Plaintiff and funding Nextdoor.com, Inc. with the confidential information opportunistically misappropriated from Plaintiff.

211. Therefore, Defendants are liable for all damages proximately resulting from their conduct, the exact amount of which will be proven at the time of trial.

## **EIGHTH CAUSE OF ACTION**

## **Negligent Misrepresentation**

(Against Defendants Benchmark, Harvey, Fenton, Lasky, Gurley, Cassidy, Norris, and  
DOES 1-100

212. Plaintiff incorporates the allegations made in Paragraph 1 through 211 as if stated herein in their entirety.

213. Defendants made untrue representations as to a material fact. Defendants represented to Plaintiff that the information Plaintiff supplied Defendants would only be used for due diligence related to Defendant Benchmark's potential investment in Fatdoor, Inc.

214. Defendants made this false representation without any reasonable ground for believing it to be true evidenced by the fact that Defendants Tolia and Leary, the current Co-Founders of Nextdoor.com, Inc. were secret EIRs at Defendant Benchmark during the same time this false representation was made to Plaintiff;

215. Defendants made this false representation with the intent to induce Plaintiff to act in reliance on it. Indeed, Plaintiff ended up giving Defendants all confidential information related to the Nextdoor concept, including presentations, unpublished patent applications, technical information and all other confidential information described herein, including the Executive Summary.

216. Plaintiff relied on Defendants' false representation and Plaintiff's reliance was justified because Plaintiff was looking for funding for his company, Fatdoor, Inc.

<sup>56</sup> Plaintiff has suffered damages, in an amount to be proven at trial, due to his reliance on Defendants' false representations.

**NINTH CAUSE OF ACTION**  
**Tortious Interference with Contract**

(Against Defendants Benchmark, Harvey, Fenton, Lasky, Gurley, and DOES 1-100)

218. Plaintiff incorporates by reference paragraphs 1 through 217, inclusive, set forth above.

219. A valid employment contract existed between Plaintiff and Fatdoor, Inc. Plaintiff was the CEO of Founder and CEO of Fatdoor, Inc. and had created tremendous shareholder value for the company.

220. Defendants knew of the existence of the employment contract between Plaintiff and Fatdoor, Inc. at the time of the interference.

221. Defendants intended to induce a breach of this employment contract. Defendants recommended that Plaintiff be fired as CEO of Fatdoor, Inc. and even referred a headhunter, Love, to find a replacement for Plaintiff.

222. As a result of Defendants' conduct, Fatdoor, Inc. terminated Plaintiff's employment as CEO, as mentioned in this First Amended Complaint.

223. Therefore, Defendants are liable for all damages proximately resulting from their conduct, the exact amount of which will be proven at the time of trial.

**TENTH CAUSE OF ACTION**  
**Unjust Enrichment**  
(Against all Defendants and DOES 1-100)

224. Plaintiff incorporates by reference paragraphs 1 through 223, inclusive, set forth above.

225. Defendants did in fact receive, obtain and/or gain the use and/or possession of such assets and intellectual property of Plaintiff and Fatdoor, Inc. as referenced in this First Amended Complaint.

226. Defendants would be unjustly enriched if they were to retain and/or realize the benefit of said assets and intellectual property without compensating Plaintiff for the fair value thereof.

227. Plaintiff is entitled to restitution and declaratory relief.

228. Defendants' wrongful acts and omission in commission and furtherance of their aforesaid unjust enrichment which are attributable to Defendants as aforesaid, were engaged in willfully, wantonly and deliberately, and with the intent to cause damage to Plaintiff or with reckless disregard of the substantial likelihood that Plaintiff would suffer and incur damages thereby, and as such were so outrageous and shocking to the conscience that the imposition of punitive damages upon Defendants is warranted.

## **ELEVENTH CAUSE OF ACTION**

ELEVENTH CAUSE OF ACTION  
Unfair Business Acts and Practices in Violation of Business and Professions Code § 17200  
(Against Defendants Benchmark, Nextdoor.com, Inc., Harvey, Fenton, Lasky, Gurley,  
Tolia, Leary, Janakiraman, and DOES 1-100

229. Plaintiff incorporates by reference paragraphs 1 through 228, inclusive, set forth above.

230. Plaintiff is informed and believes and thereon alleges that, at all times herein mentioned, Defendants Tolia, Janakiraman, and Leary were agents of Defendant Benchmark and, in doing the things herein alleged, were acting in the scope of such agency and with the permission and consent of Defendant Benchmark.

231. Beginning on or about June 15, 2007, Defendant Benchmark and its partners and EIRs named herein were privy to Plaintiff's business methods, plans, and concepts as to Nextdoor/Fatdoor and geospatial localization technologies.

232. Defendant Benchmark, on or about July 27, 2007, recommended to the Board of Fatdoor, Inc. that the company move away from neighborhood-based technologies and business.

233. On information and belief, on or about August 15, 2007, Plaintiff was terminated from Fatdoor Inc. based on the guidance of a headhunter and recruiter recommended to the board of Fatdoor Inc. by Defendant Benchmark.

234. On information and belief, on or about October 26, 2011 a new neighborhood-based startup website “Nextdoor.com” was launched based substantially on Plaintiff’s business methods, plans, and concepts as to Nextdoor/Fatdoor and geospatial localization technologies. On information and belief, Defendant Benchmark is one of the primary financiers of said startup.

235 As a direct, proximate, and foreseeable result of Defendants' wrongful conduct, as
